## Risk- and Reward Profile

The reported risk and reward category is based on historical data and cannot be taken as a reliable indication of the future risk profile of the Fund. Classification of the Fund may change over time and does not constitute a guarantee.

## Fund Portrait

The DIVAS Premia Income uses an exclusive "put writing strategy" on global equity indices, along with active portfolio management and strict risk management. The goal is to achieve a "cash-plus return" with an additional premium of 1-4% above the risk-free interest rate. The fund addresses the limitations of passive strategies and structured products. It has a low beta and low correlation to bonds and equities. By consistently harvesting option premiums and implementing rigorous risk management, the fund aims to provide steady returns across different market cycles, enhancing the return potential and stability of traditional multi-asset portfolios.
